

## DEFENCE & AEROSPACE

Varley Defence has been a preferred supplier of engineered products for the defence industry since establishment in the early 1980's. Varley can take projects from conceptual design through to product manufacture, complete with through life logistic support.

Operating to ISO 9001 standards, Varley Defence has designed and manufactured a wide variety of land, air and sea products for defence applications. Some recent contracts include:

- III Logistic Shelters
- III Equipment enclosures
- III Mobile workshops
- III Aircraft ground support equipment
- III Aircraft docking stations
- III Military vehicle components
- III Specialised truck bodies and trailers
- III Transportation containers

Varley Defence can provide customers with a range of skills based on a depth of projects experience in both design/development and manufacture of military aviation and special products. Noteworthy aspects of the company's defence specific skill base includes:

- III Project and Risk Management
- III Systems Engineering
- III Conceptual and Details design
- III 3D modeling and drafting
- III Ergonomic and Structural models
- III Prototype builds
- III Testing and Analysis
- III Logistic Support

In both prime and sub-contract arrangements, Varley Defence offers customers the benefits of knowledge, experience, flexibility, and a highly skilled design and manufacturing team supported by the full resources of Varley.
