

# ELECTRIC VEHICLES

Varley Electric Vehicles are the largest electric vehicle manufacturer in Australia and have developed a reputation for making world class vehicles and associated products which is reflected in the design of all their electric vehicles.

Using the latest in 3D computer modelling software, Varley Electric Vehicles design, and construct high quality electric vehicles of all types which minimise pollution and other forms of environmental degradation. In pursuit of this commitment throughout the world, Varley Electric Vehicles provide desirable, effective and economical transport to the needs of industry, government, commerce and the community.

Varley Electric Vehicles are sold and serviced throughout Australia and the South Pacific regions, and aspire to export vehicles to all corners of the globe to promote Australian Ingenuity. Stylish and practical in design, Varley Electric Vehicles supply cost effective, reliable and environmentally friendly electric vehicles for several applications including people movers, industrial burden carrying, tugs, and trailers.
